FIELD GROWN ROSES

HE Nursery and Florist trade of this country uses enormous quantities of field grown Roses. They would use many times what they now do if they knew where they could be supplied with first class stock at reasonable prices.

This demand we will supply through the United States Nursery Company, just established at Rich, Coahoma County, Mississippi. This company has purchased one thousand and twenty acres of delta land, and will grow all kinds of field Roses, Shrubs, etc. The climate and soil of the Mississippi Delta is peculiarly adapted to the growing of the Rose. We have been experimenting the past fifteen years with all parts of the country endeavoring to find a locality that meets all the requirements of growing a first class Rose. This we have found. We can give you a plant with good roots, well matured wood, in any of the better grades such as No. 1, XX, XXX, etc. We can supply but few No. 2 grade for the reason that with one year's growth they make a better plant than that grade. All nurserymen will realize at once that a Rose that meets their requirements in height, number of canes and caliber, with good roots, well matured wood and only one year old on its own roots, is far superior to the scrubby, imported stock now supplied the trade nearly all budded or grafted and grown from two to three years to get size to them; the fact is there is no comparison from any point of view. These are the Roses that Nurserymen and Florists have been wanting and could not get. We will have a general line of all kinds of Roses and Shrubs for Fall delivery 1904, and Spring 1905. Write to The United States Nursery Company, Rich, Mississippi, state varieties you need with quantities desired of each variety and they will quote you on your needs.

Our planting this year will exceed one million. Florists will find these Roses just what they want to pot up and bring in for Easter and Decoration Day sales.

A New Departure

We offer for the first time Roses from 4 inch pots. We have had so much inquiry in years past for a larger size Rose that we now offer nearly every kind we grow from 4 inch pots; these are nice plants and should please you.

MAMAN COCHET.

Tea. The Pink Cochet. No finer Rose than this. This Rose attracted our attention from the very first time we saw it in flower. It comes from France—the country that has produced nearly all of our best Roses. We are not alone in our admiration of it, as all the visitors to our establishment the past season have been unstinted in its praise. It is a vigorous grower, with beautiful, pretty foliage. In bud it resembles the Mermet, family, being long and shapely, borne on long, stiff stems. It is of the largest size, and, you will notice, the flower is built up or rounded and very double. The color is a deep, rosy pink, the inner side of the petals being a silver rose, shaded and touched with golden yellow. We pronounce this the finest Rose by far that has been introduced from France in the past five years. No Rose surpasses it in vigorous growth and in the immense size of its buds and flowers. Indeed, nothing in the Tea family approaches it in size, Deliciously fragrant. Madame Caroline Testout

Hybrid Tea. We grow more of this Rose than the balance of the country combined.

Probably no Rose stands higher in the public estimation today than La France, and when we say this elegant new Rose is a close counterpart of La France, we have said enough to insure its being planted by vast numbers of people. We don't know that it is any better than La France, but it is decidedly deeper and more brilliant in color and a larger flower, and is as good in other ways. It is a wonderful Rose. The petals are large, and of elegant La France form; exquisitely edged and bordered with clear silver rose. Both flowers and buds are extra large and of very elegant form; color is brilliant satiny rose, deepening in the center to a clear red. It is of excellent substance, keeps its color well, and its splendid, large, globular flowers impress everyone with a sense of its superiority and great beauty. This Rose is particularly in great demand at Portland, Oregon, and all along the Pacific coast. We sold forty thousand of this Rose the past season. Gainsborough. We are very proud to bring this fine Rose to the notice of all rosarians, be they amateur or professional. It originated with us three years ago, since when we have given it the most thorough rial, and we are fully convinced that for a hardy ever-blooming climber it has no equal, even eclips ing that grand variety, Mrs. Robert Peary. For beauty and size we place this variety at the head of the Hybrid Teas. The foliage is an exact counter part of its parent, Viscountess Folkestone. Its delicate colors are hard to describe, being delicately tinted flesh, almost white, and lustrous as satin. When in full bloom it resembles a large, fine, white, findfy pacony, but without a suggestion of stiffness, often measuring eight to nine inches in diameter. An enthusiastic admirer describes it as a Rose reminding him of a beautiful girl wearing a light-colored Gainsborough hat, ornamented with white ostrich plumes. Hence the suggestion of its name. ACALYPHAS

ACALYPHA SANDERII

Acalypha Sanderii.

Acalypna Sanderii.

This plant goes under various names, such as "Chenille Plant," "Philippine Medusa," "Comet Plant," "Dewey's Favorite Flower," "Bloody Cat Tail," etc. Without doubt the most sensational new plant introduced in many years, and one of the most striking flowering ornamental plants we have ever seen. It is of strong, free growth, with large, dark green leaves, from the axil of which rope-like spikes, from one to two feet long and nearly one inch thick, are gracefully supended, as shown in our Illustration, which conveys but a faint idea of the beauty and distinct warm coloring of this splendid acquisition. But the remarkable floriferousness and the great size of the spikes of flowers (compared to the plant) are fairly well shown. The plant is in flower the year round, and is as easily grown as a Coleus, simply requiring a warm temperature to develop its full beauty. 50 cents per dozen; \$3.00 per hundred; \$25.00 per thousand.

The leaves are large, oval-shaped, varying in size, the larger leaves meas-

uring 4½ inches wide and 8 inches long. Habit of growth is compact with free branching habit, rarely attaining a height of over 12 to 18 inches, and will be indispensable for bordering when better known. It has deep green, feathery foliage, arranged in whorls rising one above the other at regular distances. Its symmetry of form, grace and beauty of foliage are unequaled in the vegetable kingdom. Camellia Japonica.

This is the Famous "Japonica" of the South,

CAMELLIA JAPONICA

Leaves glossy green, flowers of exquisite beauty and waxy text-ure. From pure white beauty and wary texture. From pure white to crimson, in almost end less variegation, the pure white ones generally prized above the colored varieties. Calture nearly related to that of the Azalea, but their success is more certain. Requires shade and moisture throughout the hot season. Time of blooming is in Winter and in early Spring. Requires a moderate and uniform temperature with as little artificial heat as possible. When set with flower buds great care must be taken in watering—when left too dry the buds are sure to drop. We have a fine assortment in all colors. Large, strong plants, eighteen inches to two feet high, 75 cents. \$50.00 per hundred.

Clematis Paniculata.

Japanese Virgin's Bower. One of the most beautiful of our hardy flowering vines. The flowers are pure white, and are borne in large panicles or clusters of bloom, fairly covering the plant, so that it is a mass or sheet of fleecy white. The clusters are borne on long, slender stems, which stand out boldly from between the glossy green leaves, and the gentlest breeze causes wayy crests of white to flow gently over the surface. The fragrance is delicious, resembling the English Hawthorn blossoms. It is a strong, rapid grover, quickly reaching a height of from fifteen to twenty feet, and spreading out when trained to whree or string. It is perfectly hardy in all sections of the country, and we can unhesitatingly say that it is, in our opinion, the most valuable among hardy climbing vines. 60 cents per dozen; \$4.00 per hundred; \$35.00 per thousand.

CALADIUMS

Fancy-Leaved Caladiums.

Fancy-Leaved Caladiums have in recent years grown very rapidly in popular favor, not only for decoration of the conservatory and greenhouse and window boxes, but nearly all the varieties succeed admirably if planted out of doors when the ground has become warm, in partly shaded, sheltered borders, in well-enriched light soil, while for exhibition plants at fairs, etc., during the Summer and Fall months, nothing can equal their beauty. Our collection is very fine. Well-dried, extra large bulbs, our selection of sorts \$1.00 per dozen; \$8.00 per hundred.

Caladium Esculentum, or Elephant's Ear.

Smooth, of bright green color, beautifully veined and variegated with dark green. The roots should be preserved in dry sand in the cellar during Winter, out of danger from frost. Good, small bulbs, 50 cents per dozen: \$3.00 per hundred. Fine, large bulbs, \$1.00 per dozen. Four to five inches in diameter.

The habit, foliage, neck and stem are all good, and it is a fine grower and an easy doer. outer ones reflexing. This is a substantial and beautiful as a curious variety; it is slightly plumed, but is a good keeper and of excellent substance. 25 cents each; \$1.50 per

dozen.

Miss Minnie Bailey.—A seedling from Mrs. Perrin, possessing good stem and foliage, but surpassing that variety in fullness, being fully double under all conditions. Certificate C. S. A. 25 cents each; \$1.50 per dozen.

It is perfectly uniform, perfecting every flower; there are absolutely no seconds among them. Its date of blooming is October 20 and later. R. E. Richardson.—(SCHRAY'S PINK.) The brightest, clearest shade of pink yet produced in the Chrysanthemum family. Both color and form are exquisite, incurving just loosely enough to show the high color of the inside of the petal. Form very fine. Won the silver medal at the Chicago show as best pink not lighter than Morel. Also best pink at the Brooklyn show against other entries. Certificate of merit at the Philistophia show. Grows four to five feet. Scored ninety points.

The Yellow Eaton.—A bright yellow sport from Timothy Eaton, only a shade lighter than Appleton, and especially valuable as the best in its color to follow that fine variety up to the close of the Chrysanthemum season. Follage very beautiful stem first rate, and quite strong enough to hold up the monster blooms, which do not show the coarseness sometimes attributed to Eaton. For everybody's use, and for commercial purposes as well as for show, we can cheerfully recommend this grand variety. It is strictly A No. 1. Scored ninety-one. 35 cents each; \$1.50 per dozen.

FERNS.

Nephrolepis Piersonii or Ostrich Plume Fern.—The character of the frond is well shown in the photograph on page 24, although the picture conveys a slight idea of the grace and beauty of the feathery, plume-like fronds, which more nearly resemble the graceful ostrich plume than anything else in nature to which we can compare them. One has to see a plant in growth to appreciate its beauty and value. The fronds grow broad and heavy, measuring at least six inches across when fully developed, increasing in beauty as they develop. On account of the weight of the foliage the plant assumes an exceedingly graceful appearance, and owing to the fullness of the fronds, even small plants are well furnished, making much more symmetrical and beautiful plants than the Boston Fern. The divided pinnse, or the miniature fronds, keep growing constantly, showing two distinct shades of green, the ends being a light green, while the center and main part of the fronds show a dark, rich shade, the contrast producing a very beautiful effect, greatly enhancing the beauty of the plant. It is wonderfully valuable, not only on account of its beauty, but also on account of its ease of culture, hardiness and general adaptability. It has all the free-growing, hardy characteristics of the Boston Fern, and, like that plant is equally suitable for house culture and a much more beautiful plant for greenhouse and conservatory decoration. In fact, it is a plant that appeals to every one, and on that account will prove a much more valuable and profitable plant than the Boston Fern, which has had the most phenomenal sale of any decorative plant that has ever been grown, but which cannot be compared to Nephrolepis Plersoni to be made," We consider it the most valuable novelty that has been introduced in many, many years. It has taken gold medals wherever shown.

Greatly Reduced Prices This Season.

Owing to the large demand for this Fern last season, it was necessarily held at a high price, and it was difficult to meet the demand, even at the high price; but now that we have succeeded in accumulating a large stock, we are in position to offer it at a popular price, within the reach of every grower, and we anticipate a tremendous demand for it this season. We have reduced our prices as low as our stock and the demand which we anticipate will permit, and any offers for less money will unquestionably be at the expense of quality. The young stock here offered is extra strong, heavy established plants from 2½-inch pots, and not runners from the bench. Buyers will find this heavy established stock from 2½-inch pots much better value and much cheaper than runners from the bench at any price. Now that we can offer the Pierson Fern at only a slight advance over the price for which the Boston Fern can be bought, it will be found the most profitable stock that florists can put in for a summer crop, and will pay twice or three times as well as the Boston Fern, besides being much more salable, on account of its beauty and searcity.
